

Mill Creek Watershed

Sub-Watershed 05030103080020

Ground Water Pollution Potential Based on USEPA DRASTIC* System

0 0.5 1 Miles

Legend

- | | | | |
|--|---------------|--|------------------------|
| | Not Rated | | Political Boundary |
| | 79 or Less | | Limited Access Highway |
| | 80 - 99 | | U.S. Highway |
| | 100 - 119 | | State Highway |
| | 120 - 139 | | Open Water |
| | 140 - 159 | | Stream |
| | 160 - 179 | | |
| | 180 - 199 | | |
| | More than 200 | | |

*Incorporates the major hydrogeologic factors that affect and control ground water movement and occurrence including Depth to water, net Recharge, Aquifer media, Soil media, Topography, Impact of the vadose zone media, and hydraulic Conductivity of the aquifer
